

# Preveta, the care navigation software designed for specialty practices

## See the difference of running a more effective Chronic Care Management (CCM) Program in-house

### Key benefits

---

#### Improve patient engagement and satisfaction

- » Increase enrollment using your team, whom your patients know and trust.
- » Eliminate patient confusion that occurs from interacting with an outsourced vendor.
- » Maintain continuity of care and improve response time by giving patients direct access to a member of their doctor's team.

#### Increase revenue for your practice

- » Generate 50% more revenue by running CCM in-house vs. outsourcing. *See next page for more details.*

#### Identify more patients for new treatments

- » Alert your staff to missing patient data or test.
- » Navigate patients through barriers to treatment progression.
- » Identify more candidates for treatments based on your qualifying criteria.

#### Take control of your compliance

- » Comply with CCM requirements using software built around the latest regulations.
- » Entrust compliance to your staff vs. strangers.
- » Safeguard Medicare reimbursement with those who have a stake in your success.

### Specialties covered:

---

- **Urology**
- **Gastroenterology**

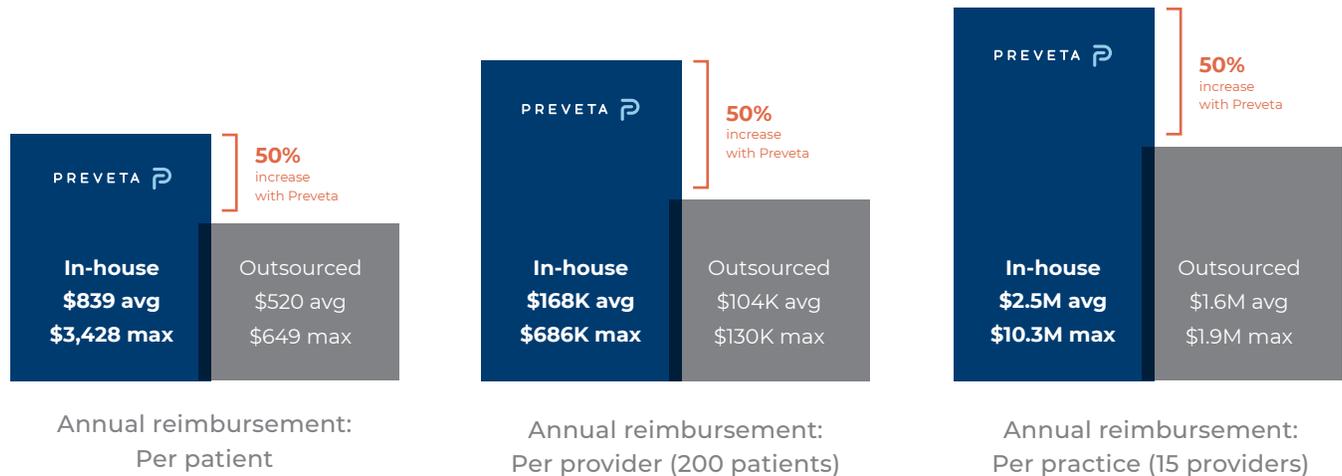

“When we look at ROI, running CCM in-house gives us both the revenue and patient outcomes. This year, I'm going to achieve my revenue goal from telemedicine and from CCM.”

*William Schiff, MD*

## Generate additional revenue using Preveta

By directly providing care coordination, assisted with our software, **your team may be reimbursed for up to 6 hours of care per patient**, which is in contrast to a **reimbursement cap of 1 hour per patient when outsourced**.<sup>1</sup>

Medicare guidelines define care provided under the direct supervision of physicians as complex CCM, allowing the greater cap, which is not applicable when those activities are outsourced.

## The Preveta difference

**Better patient engagement**

**Increased revenue**

**Improved treatment identification**

**Schedule a quick demo today to see how we can help you drive increased treatment identification and capture additional revenue.**

Your staff can implement and start CCM billing on our software in 2 weeks!

<sup>1</sup>Per Medicare reimbursement guidelines, outsourced CCM is considered non-complex, which is capped at 1 hour. By contrast, care provided under the direct supervision of the physician is considered complex CCM and is capped at 6 hours. Complex CCM requires a medical decision made by the physician, which is not possible when the CCM activities are outsourced. Using Preveta, your staff can perform tasks that progresses the patient in the treatment continuum, resulting in a medical decision.
